

```

public class TinhTongSoNguyenDuong {
    public static void main (String[] args) {
        int i = 1;
        int sum = 0;
        int n = sc.nextInt();
    }
}

```

```

public class TinhTongSoNguyenDuong {
    public static void main (String[] args) {
        Scanner sc = new Scanner (System.in)
        System.out.println ("Nhap n: ");
        int n = sc.nextInt();
        int sum = 0;
        int i = 1;
        while (i <= n) {
            sum += i;
            i += 1;
        }
        System.out.println ("Tong cac so nguyen duong
        le tu 1 den " + n + " la " + sum);
    }
}

```
